

Greenline tipper trailer

INNOVATING FOR YOU

A recognised innovator

Fliegl is a family-owned company: grounded, always committed heart and soul to what it does – and always moving. Since it was founded, Fliegl has always distinguished itself by its drive, inventiveness, and will to continue with further development of its products. And this is also why Fliegl is recognised throughout the sector as an innovator.

It's the practical benefits alone that count. And we find out exactly what is needed in practice through continuous dialogue with our customers.

Investing in safety

Our unique corporate approach allows us to determine exactly what the risks are for driver and vehicle.

Outstanding values

- Top quality as standard
- Robust, durable and stable in value
- Thought through to the last detail, mature and uncompromising in trimming down to what is useful in practice
- Certified safety
- Top sustainability values
- Green corporate concept with energy production which is environmentally friendly

INNOVATING FOR YOU

What's important for us is what counts for you:

- **Conical troughs:** low construction, high loading capacity
- Extremely robust despite **light-weight construction**
- Sensitive components are given special protection
- Weight optimisation of numerous vehicle components
- Impressive vehicle handling characteristics
- Impressive tipping qualities: just **39 seconds**.
- Double-joint articulation
- Fully bolted underrun guard with cost-saving repair features
- Spare tyre holder with innovatively simple operation
- Hard-wearing, height-adjustable standing platform on cylinders
- Long service life with low maintenance requirement

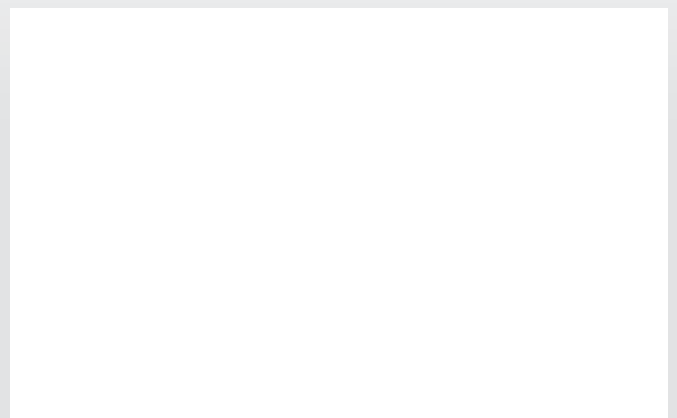

Service 24/7

- Europe-wide breakdown service (in cooperation with ADAC)
- Tyre service
- Recovery/towing
- Troubleshooting on electrical/electronic systems
- Fliegl 24/7 Service: +49 (0)800-5 78 78 76

Fliegl – an outstanding brand

High Insulation

A recognised innovator

Fliegl is a family-owned company: grounded, always committed heart and soul to what it does – and always moving. Since it was founded, Fliegl has always distinguished itself by its drive, inventiveness, and will to continue with further development of its products. And this is also why Fliegl is recognised throughout the sector as an innovator.

It's the practical benefits alone that count. And we find out exactly what is needed in practice through continuous dialogue with our customers.

ASPHALTPROFI THERMO

- High Insulation with Fliegl Isotherm
- 100% moisture resistant
- High insulation value: Heat transfer resistance (required by law): R about 1.65 K m²/W (at 20°C), heat transfer resistance: R about 2.5 K m²/W (at 20°C), Lambda value (heat conductivity): just 0.028 W/mK
- Particularly profitable: The conical trough in this fully insulated light-weight construction ensures residue-free unloading and optimal insulation characteristics

Construction trough

- Minimal weight
- Very fast unloading
- Lower loading height
- Low centre of gravity for better ride stability
- Demonstrably lower fuel consumption (up to 10%)

Investing in safety

Our unique corporate approach allows us to determine exactly what the risks are for driver and vehicle.

Large aluminium trough

- Large volume, low weight, but extremely robust
- Aerodynamic panelling

Large steel trough

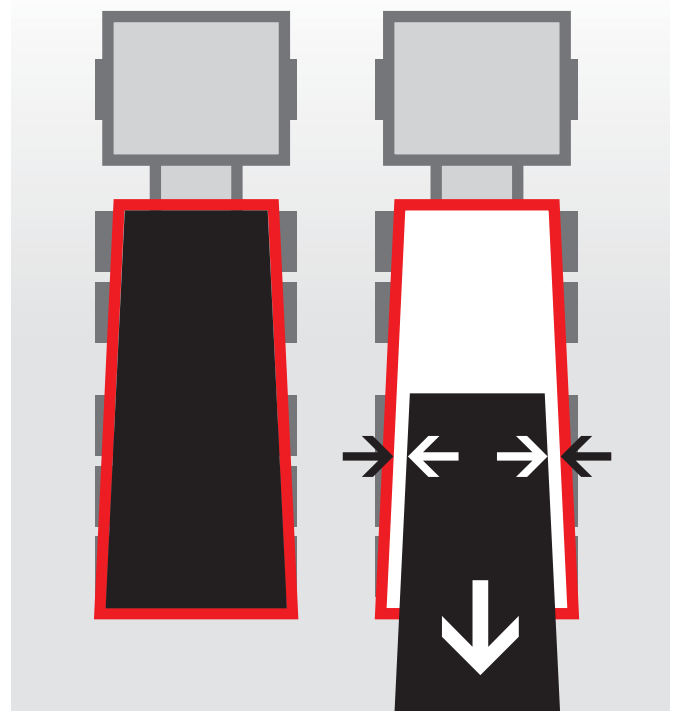

- For heavy and aggressive goods: Steel scrap, slag
- High quality, extremely tough and abrasion-resistant steel (HB 450)
